Growing Gardens. Enriching lives

Moreno Elementary

Mustang's Growing Seeds Garden

Winter 2017, Before

Spring 2017 Family and Friends Event

Moreno Elementary, another school whose garden became neglected through disuse, began their revitalization in Winter of 2016 and joined the Fresh Start II program. Garden Leader Jennifer Blaise and other teachers completed our professional development course, *Organic Gardening 101: Teaching in the Outdoor Classroom*, and received consultation organizing resources. As Fresh Start II participants, Moreno received additional educational and material support. The Moreno Gardening Club successfully hosted a community event where they completed weeding of heavily overgrown beds and got them into shape for Spring plantings. Afterwards, during class time students had a wonderful time planting and harvesting seasonal veggies. For summer school, Moreno continued gardening maintenance and has prepared for Fall gardening.
